

SOL CUSTOMS

One-Page Luxury Automotive Website PRD

Replit build | Netlify deploy | Direct email quote automation

Prepared for a premium vehicle wrap, colored PPF, lighting, engraving, aero, and aftermarket customization brand serving Ruskin and the Tampa Bay area.

Business	Sol Customs
Email	inquire@solcustoms.com
Phone	770-0377-9390
Hours	Everyday, 10:00 AM - 8:00 PM
Service Area	Ruskin and Tampa Bay area
Build Stack	HTML, CSS, vanilla JavaScript in Replit
Deployment	Static site deployed on Netlify

1. Project Overview

Create a luxury, modern, one-page website for Sol Customs, a premium automotive customization business serving Ruskin and the Tampa Bay area.

The website will be built in Replit using HTML, CSS, and JavaScript, then deployed as a static site on Netlify. The design should feel dark, luxurious, sexy, smooth, automotive-focused, and mobile-friendly.

The main business goal is to capture qualified leads through a polished Get a Free Quote form that sends requests directly to the business owner email without opening the customer's mail app and without requiring the owner to log in to Netlify to check leads.

2. Business Information

Business Name	Sol Customs
Industry	Automotive customization
Email	inquire@solcustoms.com
Phone	770-0377-9390
Hours	Everyday, 10:00 AM - 8:00 PM
Service Area	Ruskin and Tampa Bay area

Launch note: verify the phone number before final publication because it appears longer than a standard 10-digit U.S. phone number. Keep the number exactly as provided until the owner confirms the correct formatting.

3. Brand Direction and Visual Style

Sol Customs should look like a luxury automotive brand, not a generic wrap shop. The visual direction should feel like a dark exotic-car showroom, a cinematic garage, and a premium custom build portfolio.

- Luxurious, dark, clean, high-performance look
- Sexy but not cluttered
- Smooth scrolling and premium micro-interactions
- Large automotive visuals with controlled negative space
- Gloss, carbon, champagne metal, shadow, and reflection details

Recommended Color Palette

Color Role	Hex	Usage
Deep Obsidian Black	#050505	Main background

Carbon Black	#111111	Cards, nav, section contrast
Champagne Gold	#C6A15B	Luxury accent, buttons, lines
Brushed Graphite	#8A8F98	Secondary accents and borders
Warm White	#F5F2EA	Main text on dark backgrounds
Deep Burgundy	#7A1F2B	Optional small hover/callout accent

4. Website Navigation

Create a sticky top navigation bar with a dark glass effect. The menu should smoothly scroll to each section and work on desktop, tablet, and mobile.

- Home
- About
- Services
- Gallery
- Free Quote
- Contact

Mobile navigation should use a clean hamburger menu with smooth open and close animation. The header should remain legible over dark hero imagery.

5. Website Sections

5.1 Hero Section

Purpose: make visitors instantly feel that Sol Customs offers high-end automotive transformations.

Headline: Luxury Automotive Customization, Built to Stand Out

Subheadline: Sol Customs designs and installs premium vehicle wraps, colored PPF, custom lighting, engravings, aero parts, and aftermarket upgrades for private and commercial vehicles across Ruskin and the Tampa Bay area.

- **Primary CTA:** Get a Free Quote
- **Secondary CTA:** View Services
- Use cinematic dark automotive imagery or high-end placeholder visuals until real work photos are available.
- Add fade-in text, subtle parallax, glow button hover, and a thin champagne accent line.

5.2 About Section

Purpose: explain who Sol Customs is, what makes the work personal, and why visitors should trust the brand.

Suggested copy:

Sol Customs is a premium automotive customization brand serving Ruskin and the Tampa Bay area. From color-changing wraps and colored PPF to lighting upgrades, engravings, aero installs, and aftermarket parts, every project is designed to give vehicles a bold, clean, and unforgettable finish.

The owner personally designs and installs vehicle wraps, giving each project a custom approach from concept to completion. Whether it is a private vehicle, commercial wrap, fleet upgrade, or personal showpiece, Sol Customs focuses on precision, style, and detail from every angle.

This is more than customization. This is identity on wheels.

5.3 Services Section

Create a luxury card grid. Each card should include a title, short description, and subtle icon or line-art detail.

Vehicle Wraps Custom full and partial wraps designed to transform cars, trucks, vans, and specialty vehicles.	Colored PPF Colored paint protection film that gives vehicles a premium finish while helping protect the paint.
Commercial Wraps Professional wraps for business vehicles, work trucks, vans, fleets, and mobile branding.	Tail Light Engravings Custom tail light engraving for a unique, detailed, and personalized finish.
Glass Engravings Custom glass engraving for automotive windows, panels, or specialty details.	Star Lights Luxury star light headliner installs that create a premium interior atmosphere.
Ambient Lighting Custom interior ambient lighting for a modern, high-end driving experience.	Aero Install Installation of front lips, splitters, diffusers, spoilers, side skirts, and aero upgrades.
Aftermarket Part Install Installation of select aftermarket parts to enhance the look and personality of the vehicle.	

5.4 Gallery Section

Purpose: showcase completed work in a premium portfolio style.

- Responsive image grid with lazy loading
- Hover zoom effect and lightbox image preview
- Gallery categories: Wraps, Colored PPF, Lighting, Engravings, Aero, Commercial Vehicles
- Use placeholder images until real Sol Customs project photos are added
- Gallery should feel curated and luxurious, not like a random image dump

5.5 Get a Free Quote Section

Purpose: capture leads directly on the website and send quote requests to the business owner email without opening the visitor's email app.

Section headline: Get a Free Quote

Section copy: Ready to transform your vehicle? Tell Sol Customs what you drive and what service you are interested in. The team will review your request and contact you back with the next steps.

Required form fields:

- Full Name
- Email Address
- Phone Number
- Vehicle Year / Make / Model
- Service Interested In
- Message / Project Details

Service dropdown options:

- Vehicle Wrap
- Colored PPF
- Commercial Wrap
- Tail Light Engraving
- Glass Engraving
- Star Lights
- Ambient Lighting
- Aero Install
- Aftermarket Part Install
- Not Sure Yet

Quote Form Automation Requirement

Do not use mailto. Do not use Netlify Forms as the lead inbox. Do not require the business owner to log in to Netlify to check leads.

Recommended architecture:

Step 1	Customer fills out quote form on the website.
Step 2	Frontend JavaScript submits the data in the background using fetch().
Step 3	A secure backend endpoint receives the request and validates it.
Step 4	An email API such as Resend, Postmark, SendGrid, or a form automation tool sends the lead to inquire@solcustoms.com.
Step 5	Customer sees a success message on the website: "Thank you. Your quote request has been sent. Sol Customs will contact you soon."

Best implementation choice: use a secure serverless endpoint plus an email API such as Resend. If the client wants to avoid any Netlify backend features entirely, host the endpoint with Cloudflare Workers, Vercel Functions, or another simple serverless provider, while still keeping the main static website deployed on Netlify.

No API keys should ever be placed in frontend JavaScript. Store email API keys only as secure environment variables in the backend provider.

Form Behavior and Validation

- Required validation for name, email, phone, and service
- Honeypot spam field

- Optional rate limiting or CAPTCHA if spam becomes a problem
- Clear success and error messages
- Mobile-friendly inputs and large tap targets
- Email delivered to inquire@solcustoms.com with all customer details
- Optional automatic customer confirmation email in a later phase

5.6 Why Choose Sol Customs Section

Section title: Built for Drivers Who Care About the Details

- Owner-designed and installed projects
- Premium automotive styling
- Clean, precise installation
- Private and commercial vehicle services
- Custom look for every build
- Attention to edges, details, materials, and presentation
- Serving Ruskin and the Tampa Bay area

Suggested copy: Every Sol Customs project is treated like a rolling piece of design. The goal is not only to change how a vehicle looks, but to create a finished build that feels intentional, sharp, and unforgettable.

5.7 Contact Section

The contact area should make it easy to call, text, email, or return to the quote form.

- Email: inquire@solcustoms.com
- Phone: 770-0377-9390
- Hours: Everyday, 10:00 AM - 8:00 PM
- Service Area: Ruskin and Tampa Bay area

Contact buttons: Call Now, Text for a Quote, Email Sol Customs, Get a Free Quote. The Get a Free Quote button should scroll back to the quote form.

6. SEO Requirements

Meta title: Sol Customs | Vehicle Wraps, Colored PPF & Custom Auto Styling in Tampa Bay

Meta description: Sol Customs provides premium vehicle wraps, colored PPF, lighting installs, engravings, aero installs, and aftermarket part installation for private and commercial vehicles in Ruskin and the Tampa Bay area.

Suggested SEO keywords:

- vehicle wraps in Ruskin FL
- car wraps Tampa Bay
- colored PPF Tampa Bay

- commercial vehicle wraps
- custom car lighting
- star light headliner install
- ambient lighting install
- tail light engraving
- glass engraving
- aero kit installation
- aftermarket car part installation
- automotive customization Tampa Bay

7. Technical Requirements

- HTML5, CSS3, and vanilla JavaScript
- Mobile-first responsive design
- Smooth scrolling navigation
- Sticky glass-style navbar
- Hamburger menu on mobile
- Gallery lightbox
- Scroll reveal animations
- Lazy loading images
- SEO metadata and semantic HTML
- Fast loading performance
- Static Netlify deployment for the main website
- Quote form handled through secure backend email automation, not mailto and not Netlify Forms lead storage

8. Recommended File Structure

[/index.html](#)

[/styles.css](#)

[/script.js](#)

[/assets/images/](#)

[/api/send-quote.js or external serverless endpoint](#)

9. Deployment Notes

For a plain HTML, CSS, and JavaScript website deployed on Netlify:

- Build command: leave blank
- Publish directory: /

If a separate backend is used for the quote form, add the endpoint URL in the frontend JavaScript and restrict allowed origins to the Sol Customs domain.

If using a serverless function, the email API key must be stored in the backend provider environment variables. Never place secret keys in public frontend code.

10. Success Criteria

- Website feels premium, luxurious, and automotive-focused
- Mobile layout looks excellent and loads quickly
- Navigation smoothly scrolls to all sections
- Services are clear and easy to understand
- Gallery makes the brand feel high-end and visual
- Get a Free Quote form captures leads without opening the customer's mail app
- Business owner receives quote requests directly at inquire@solcustoms.com
- Website deploys cleanly on Netlify
- The site feels like a luxury custom automotive brand, not a generic repair shop

Appendix: Replit Agent Prompt

Use this prompt in Replit Agent:

Build a production-quality one-page website for a luxury automotive customization business called Sol Customs.

Use HTML, CSS, and vanilla JavaScript only. The site must be static and ready to deploy on Netlify.

The website should feel luxurious, sexy, modern, dark, sleek, and premium, similar to a luxury car brand. Use a color palette with deep obsidian black #050505, carbon black #111111, champagne gold #C6A15B, brushed graphite #8A8F98, warm white #F5F2EA, soft gray #A7A7A7, and optional deep burgundy #7A1F2B for small accents.

Business information:

Business Name: Sol Customs

Email: inquire@solcustoms.com

Phone: 770-0377-9390

Hours: Everyday, 10:00 AM - 8:00 PM

Service Area: Ruskin and Tampa Bay area

Sol Customs specializes in car wrapping, colored PPF for private and commercial vehicles, and custom automotive design and installation. The owner designs and installs wraps. Additional services include tail light engravings, glass engravings, star lights, ambient lighting, aero install, and aftermarket part install.

Create a sticky top navigation menu with: Home, About, Services, Gallery, Free Quote, Contact. When users click each menu item, it should smoothly scroll to the correct section. Make sure navigation works on desktop and mobile. Add a hamburger menu on mobile.

Website sections:

1. Hero Section

Headline: Luxury Automotive Customization, Built to Stand Out

Subheadline: Sol Customs designs and installs premium vehicle wraps, colored PPF, custom lighting, engravings, aero parts, and aftermarket upgrades for private and commercial vehicles across Ruskin and the Tampa Bay area.

Buttons: Get a Free Quote and View Services.

Use a cinematic dark automotive background or placeholder luxury car imagery.

2. About Section

Write premium copy explaining that Sol Customs transforms ordinary vehicles into head-turning custom builds. Mention that the owner designs and installs the work. Mention private vehicles, commercial vehicles, wraps, colored PPF, lighting, engravings, aero installs, and aftermarket parts.

3. Services Section

Create luxury service cards for: Vehicle Wraps, Colored PPF, Commercial Wraps, Tail Light Engravings, Glass Engravings, Star Lights, Ambient Lighting, Aero Install, Aftermarket Part Install. Each card needs a short description.

4. Gallery Section

Create a responsive image gallery with placeholder automotive images. Add hover effects and a lightbox when users click an image. Use lazy loading. Include sample categories like Wraps, PPF, Lighting, Engravings, Aero, and Commercial Vehicles.

5. Get a Free Quote Section

Create a premium lead-capture quote form. Do not use mailto. Do not use Netlify Forms as the lead inbox. Do not require the business owner to log in to Netlify to check leads.

The form should collect: Full Name, Email Address, Phone Number, Vehicle Year / Make / Model, Service Interested In, and Message / Project Details.

The Service Interested In dropdown should include: Vehicle Wrap, Colored PPF, Commercial Wrap, Tail Light Engraving, Glass Engraving, Star Lights, Ambient Lighting, Aero Install, Aftermarket Part Install, Not Sure Yet.

The form should submit in the background using JavaScript fetch() to a secure backend endpoint. The backend endpoint should send the quote request directly to inquire@solcustoms.com using an email API such as Resend, Postmark, SendGrid, or an equivalent form automation service.

Do not expose the email API key in frontend code. Store all API keys as secure environment variables in the backend provider.

After submission, show this success message: Thank you. Your quote request has been sent. Sol Customs will contact you soon.

Add a honeypot spam field and basic frontend validation.

6. Why Choose Sol Customs Section

Include trust-building points: Owner-designed and installed projects, Premium automotive styling, Clean precise installation, Private and commercial vehicle services, Custom look for every build, Attention to detail, Serving Ruskin and the Tampa Bay area.

7. Contact Section

Include: Email inquire@solcustoms.com, Phone 770-0377-9390, Hours Everyday 10:00 AM - 8:00 PM, Service Area Ruskin and Tampa Bay area. Add buttons: Call Now, Text for a Quote, Email Sol Customs, Get a Free Quote. The Get a Free Quote button should scroll to the quote form.

Technical requirements: Mobile-first responsive design, smooth scrolling, sticky glass-style navbar, fast loading, SEO optimized, clean semantic HTML, modern CSS, vanilla JavaScript, gallery lightbox, scroll reveal animations, secure quote form email automation, Netlify compatible static deployment, no mailto.

Meta title: Sol Customs | Vehicle Wraps, Colored PPF & Custom Auto Styling in Tampa Bay

Meta description: Sol Customs provides premium vehicle wraps, colored PPF, lighting installs, engravings, aero installs, and aftermarket part installation for private and commercial vehicles in Ruskin and the Tampa Bay area.

Make the final design feel like a high-end automotive brand, not a generic wrap shop.
